★★★★☆ **Broke after 45 days**

Reviewed in the United States on August 5, 2018

The unit I purchased worked fine for the first 45 days or so, then just stopped recharging and now is inoperable, the return was limited to 30 days so that's \$140 down the drain. My advice would be to avoid this product.

My son loves his hover board, got it for his 9th birthday, it was the only gift we got him and he was so happy, got the sweetest reaction out of him. This is awesome, he loves that he can connect his ipod to the board and play music while he rides around, the lights are awesome when riding it at night, the speakers are loud and instructions were real easy to follow. Not bad for the price, we are very happy with our purchase, especially the 9yr old 😊

Good quality at this price with a few minor inconveniences

Reviewed in the United States on July 29, 2018

Verified Purchase

Great quality for the price point, built in Bluetooth speaker isn't the best, gets very quiet on carpet but loud on any hard surface (hard wood, tiles, concrete, etc...) more sensitive compared to others as well faster spinning than others I have tried takes a bit of getting used to due to the sensitivity level

Do not buy! Worked for first charge only.

Reviewed in the United States on May 10, 2020

Verified Purchase

I bought this for my daughter for a Christmas present. She charged it up on Christmas and used it that day and the next day. We live in the midwest so we had an unusually warm Christmas and then it got cold for a few months. We took it back out and charged it up a few weeks ago, only to find that it doesn't even charge. The lights don't even turn on to indicate that it is plugged in. It does not work and of course the return window has closed. From other reviews it sounds like it is a defect with this hoverboard. I would not recommend this particular hoverboard.

★★★★★ **Broke quickly**

Reviewed in the United States on January 8, 2020

Even after seeing some reviews saying these broke quickly, I bought one as a Christmas gift. It broke (motor burned up) after very little, indoor only use. I wouldn't recommend this product and will be buying a different brand as a replacement.

I liked that it was worth the money, the battery life sucks but I guess it's because of all the light features that it has. My eight year old son loves it. It's so heavy to carry though! I like that it brought a case to carry it with!!!

Question: There was no paperwork at all in our box. We were able to get it together and run it but we don't know how to get the music hooked up nor know about c

Answer: Download gyroor app. I'm pretty sure you have to have that. Also, I vaguely remember maybe holding down the power button when syncing to your phone or tablet or whatever you're playing music on. Then go into your Bluetooth settings and sync to the gyroor.

★★★★★ Will make any kid very happy!! Everyone will want to ride the scooter!

Reviewed in the United States on August 10, 2019

Color: blue with Kart-T581 | Verified Purchase

Son and father loveeeee this hover board and scooter. After 30 seconds of understanding how the scooter controls work, my son was hooked. His father made him get off it so he can try it. Lol. They spent the entire weekend riding it. They rode through grass, a neighbors flower bed, and a little in the street. We can confirm the all-terrain. ;)

The scooter sits very very low to ground - we live outside the city and don't have a lot of sidewalks so I only allow my son to use it our driveway or through the yard.

The speaker is loud and clear - if I see my son riding, sometimes I pair it to my phone and put on some old school jams - drives my son crazy, lol.

★★★★★ Very nice hoover board

Can't address battery life because we have not had it long. There is a definite learning curve to riding but after mom reading directions several times and a few concentrated riding sessions my granddaughter did get comfortable on it. She does love the look of it with the lights etc.

Bought this as a gift. Daughter loves it! It is a very nice board and has a good bluetooth speaker. She rides in the grass and on the street, as both surfaces allow great movement and speed. The lights in the wheels are really cool, too! Very happy with this product. User is 10 years old, first hover board purchase, easy to use! Customer Service is A+++++

★★★★★ **PERFECT 10th Birthday Present! :)**

Reviewed in the United States on September 19, 2019

Verified Purchase

Our daughter LOVED receiving this for her 10th birthday! She had been begging for a hoverboard and we researched tons of boards and are so glad we bought this one! The lights and the music are really cool! She had no trouble using this either. Although she has used friends before so she did have some experience. She has ridden it inside on our hardwood floors, outside on our paved driveway and even in the grass and it has worked great everywhere! Did I mention the lights and music are really cool? :)

★★★★★ **Great hoverboard**

Reviewed in the United States on August 1, 2019

Verified Purchase | **Early Reviewer Rewards** ([What's this?](#))

I purchased this hoverboard for my 10 year old granddaughter because all of the girls her age in the neighborhood have one. She is thrilled with it and rides it constantly when she is visiting me. It only took her about 45 minutes to learn to ride it well. It seems very stable and she absolutely loves the colorful lights and bluetooth. The battery lasts a reasonable length of time also. She took it to her friend's house the other day and the mother messaged me wanting to know which one it is. Of course I sent her the link!

Question: [How to re-calibrate this tomoloo Hoverboard.?](#)

Answer: There are bunch of videos on that on YouTube. Usually you have put the board on a flat surface, level it, and hold the power button for couples of secs (around 5 secs). Make sure the board is not moving while you doing this.

We bought this for our 9 year old son. He was incredibly excited when he opened it. It took him about 5 minutes to get the hang of it and was zooming around our living room. The video was taken after he had been riding for about 15 minutes. His seven year old brother took a turn and was also able to master it in about five minutes. I tried it and it took me a little longer to start to figure it out. The boys love the

lights and we hooked up the speaker to our iPhone without a problem.

Update: So the customer service team contacted me on their own initiative and offered me several choices. They went so far out of their way to help solve the problem, I am willing to believe this was a faulty one off problem and ordered another one. I will update again in few months.

While my nephew (who is about 80 lbs) was riding it, he went over a very mild bump and the plastic on the bottom cracked down the middle, causing the unit to stop suddenly, throwing my nephew off at speed. He fractured his arm. Not impressed though it could have been a 1 off.

★★★★★ **Good product and great customer service.**

Reviewed in the United States on March 23, 2020

Verified Purchase

We've had two of these for the last several months (Christmas presents for both kids) and they have been great so far. We did run into an issue with my son's recently which prompted this review. He said it was acting funny and he could not ride it because of that. I dropped an email to their support team and writhing 2 days I got a response with instructions on how to re-calibrate the hoverboard, as well as a video showing how to perform the process. Upon re-calibration, the hoverboard is back to working as expected. So big kuddos to their support team for responding quickly and providing detailed information.

If anyone needs it, the calibration process is simply setting the hoverboard flat, then holding down the power button for about 8 seconds or so, till it starts beeping rapidly. Then turn it off and back on and should be ready to go. Make sure when doing this that both pedals are flat and not leaning forward or back, otherwise it will throw things off. I'm guessing someone must have held down the power button at some point, which is how it got messed up.

Again, product seems great, and customer service was great as well. Highly recommend.

★★★★★ **Great for the older kiddos!**

Reviewed in the United States on February 12, 2020

Verified Purchase

I purchased this hoverboard for my son for his 10th Birthday. After scouring the reviews I went with this one due to the price and the fact that so many reviews mentioned their kids were able to get the hang of it really fast. My son has taken a few spills and it's gotten scuffed up after only one use but he seems happy with it! I love the bright lights which are also good for safety purposes! I kind of wish it had a matte texture to help hide the scuffing and we haven't had any battery issues yet so I can't really comment on the battery life since it's lasted a few rides so far! We have not yet tried the Bluetooth either so again...I'm not sure just yet but this thing is heavy duty and works on our driveway. My son is happy so I am happy!

I was told to leave a positive review to receive a free carrier bag and they never sent it to me. I'm disappointed with how quick this has gotten scratched up and still can't figure out the Bluetooth but the kid loves it.

★★★★★ **Fun for the kids**

Our kids love this hoverboard. It took no more than 5 minutes for either of them to start comfortably moving around the house. They can't wait to try it outside. The only problem is they won't want to give each other turns. The lights are definitely bright and pleasant. Bluetooth audio worked on first try. Battery charges relatively quick, usually faster than the stated time. I have not been able to get a decent understanding of battery life as of yet since the kids are using it on and off all day, with numerous start-stop and turn sequences.

A Christmas present for my granddaughter is a huge hit. She picked it up very quickly and rides it like a pro. Perhaps a couple of years of gymnastics has made her pretty agile. Lots of lights and a Bluetooth speaker makes it quite an experience. Did some research before making the purchase and found the Tomoloo brand to be among the top rated.

★★★★★ **Great deal and awesome buy**

Reviewed in the United States on December 30, 2019

I got this HoverBoard for my son who is 13. He loves the Bluetooth option and the lights he says are cool. The speaker is really loud and plays good while he is on the board. I do have to say I am impressed with the quality of the board. It is kind of heavy but that is due to the strong material that is used. I have handled several brands and they seem to be very light and made of plastic. That won't work well for my son. He is rough on his toys. This one seems to be very well made and good strong material. I see this lasting for some time which is important to me.

I would recommend this to anyone.

My 9 year old boy loves his hover board, him and his older sister each got one for Christmas and have been riding them every day since then. It took him a few days to get the hang of it, but now he loves it. These seem to be built better than some of the other ones that some of the neighborhood kids have. The lights and music via Bluetooth connection are fun feature as well. The only issue we had was that after a couple of days of use, the lights on the front and back stopped working, Amazon took care of us and now he is back cruising around.

★★★★★ **Awesome Hoverboard!**

My son just got this hoverboard yesterday and he's been playing with it non stop since! He's 7 years old and has no problem controlling it... even his little 4 year old sister rides it! The lights are an extra cool effect (especially in the dark). It has nice large rubber wheels with multi color lights, and it even arrived charged so my son could play right away. It charges fully within 2-3 hours and lasts for about 3 hours of play. This is fun for the whole family. Now his sister wants one for Christmas. I would purchase it again!

First one broken on arrival, replacement broke within an hour.

Reviewed in the United States on July 31, 2020

Color: Blue **Verified Purchase**

So we originally ordered this for my son's 9th birthday. We opened it up the night before so it would be charged when he got up. When we lifted it out of the box the bottom literally fell off. We were sent a replacement, which took 2 weeks to arrive. We received it last night, charged it overnight (in the styrofoam). After less than 1 hour of use (inside), no bumps or bangs or anything, the bottom of the new one fell to the ground, right in front of me. This is a complete piece of junk. I never write reviews (however I always read them and researched these things for awhile before settling on this one), I like to give products the benefit of the doubt when there are negative reviews. However, this is actual garbage. I have a little boy who has been waiting so patiently, and has had gotten to use it less than 60 minutes. So now we either Epoxy it together (seems insane for a \$300 BRAND NEW hoverboard doesn't it). Or send it back yet again. The bottom is held together with a tiny sliver of plastic, about as thick as a pinkie nail. It looks cool, I'll give them that. The lights look pretty, but it's really not supposed to be a work of art. Find another brand, this is a complete waste of money. ☹

So save yourself the headache and do t purchase from this company.

I bought this hoverboard in black for my daughter (12), she loved it so much that I ended up getting a blue one for my son (7). They are self balancing so it's easy for my 7 yr to catch on pretty quickly. The lights are really fun and it's really cool that they can play their music from their boards as they ride around. The sound doesn't get too loud but I wouldn't want it to be any louder. Definitely would recommend this brand.

My daughters love it. They are 6 and 7 and do great in it. I love the safety features. Wish it came with a bag to carry because they are quite heavy. And if you attach your phone to it once every time you are around it it wants to play and will say connecting even if you don't want it too. The boards came already fully charged which was nice. The first day there was some hints of issues such as boards shaking or taking off when one foot was placed on. But all problems have dissipated after re-calibrations, which is as simple as having the board on a flat surface and holding the 'on' button. I purchased 3 of these hover boards and the three kids (ages 9, 12 and 15) won't stop riding them. They love them!
